## FSPS Ultimate Airline Crew

**DOWNLOAD:** <https://byltly.com/2isbak>

**Download**

This application was developed by a Brazilian developer using the Flysafe Technologies Pvt. Ltd. library that allows you to add voice announcements to the airline in real time. The design of the application is minimalistic and simple, requiring the user to input some initial data to start the recordings. In the future, the developer plans to add more languages and functionalities to this application. Authors: Paulo Henrique Franca and Nelson Almeida Source: Simulator's Training Manager 2014 {#S3-9}

----- The simulator's training manager 2014 is an application that allows the user to create various challenges, customizing the game according to the dynamics of the aircraft and the specific training needs of the pilots. The application also allows users to view the results of the training, allowing them to compare them with the performance of the same pilots. The application was built using the Aurora Scientific educational software for Android and iOS platforms, the Aurora Scientific Sensor Manager for Android, and the Aurora Sensors API for iOS. This application is maintained by the Brazilian Air Force's Air Training Center (CTT) and is part of a larger project to provide the pilots with more training tools.

Workshop Simulator {#S3-10} ----- The simulator's workshop is an application that allows the user to make simulations of assembling and disassembling the tools in the cockpit, making the mission more efficient and realistic. The application was built using the Aurora Scientific educational software, the Aurora Scientific Sensor Manager for Android, and the Aurora Sensors API for iOS. This application is maintained by the Brazilian Air Force's Air Training Center (CTT) and is part of a larger project to provide the pilots with more training tools. Source: 82157476af
